

Budget Planner Application

Budget Creation

- 1.1 Allow users to create multiple budgets for different time periods (e.g., weekly, monthly, annually)
- 1.2 Set income and expense categories for each budget
- 1.3 Specify budget amounts for each category
- 1.4 Display total budget and remaining balance for each category

Expense Tracking

- 2.1 Allow users to manually add expenses
- 2.2 Connect to bank accounts and credit cards to automatically import transactions
- 2.3 Categorize expenses based on predefined categories or user-defined categories
- 2.4 Set alerts for overspending or reaching certain thresholds for specific categories

Income Tracking

- 3.1 Allow users to manually add income
- 3.2 Connect to bank accounts and credit cards to automatically import income transactions
- 3.3 Categorize income based on predefined categories or user-defined categories

Bill Tracking

- 4.1 Add and track recurring bills (e.g., rent, utilities, subscriptions)
- 4.2 Set reminders for upcoming bills
- 4.3 Mark bills as paid

Reports and Analytics

- 5.1 Provide graphical representations of spending and income over time
- 5.2 Display spending by category or by merchant
- 5.3 Provide recommendations for saving or cutting expenses
- 5.4 Allow users to export data to spreadsheets or PDFs

Security and Privacy

- 6.1 Use encryption to protect user data
- 6.2 Allow users to set up two-factor authentication
- 6.3 Provide a privacy policy that outlines how user data is stored and used

Accessibility

- 7.1 Provide a user-friendly interface with clear instructions and labels
- 7.2 Provide accessibility features for users with disabilities
- 7.3 Support multiple languages and currencies
